

Special Issue

Application and Prospect of Optical-Related Imaging Technology in Biomedical Imaging

Message from the Guest Editor

Optical Imaging has attracted attention in academic circles due to its ability to provide physical and functional medical information. There are many branches of optical-related imaging technology, such as Optical Coherence Tomography, Photoacoustic Imaging, and Multi-photon Microscopy, etc. For this Special Issue, "Application and Prospect of Optical-Related Imaging Technology in Biomedical Imaging", we invite submissions of original papers and reviews investigating the applications of and prospects for optical-related imaging technology in biomedical imaging and molecular imaging. The submitted papers should have broad research prospects, with independent insights, and experiments with reliable data. Contributions are welcome in the form of reports, technical applications with a scientific basis, and experimental bulletins of phased scientific research results.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
