Oral Pathology and Medicine: Diagnosis and Therapy

Message from the Guest Editors

It is our pleasure to invite you to contribute to a Special Issue entitled Oral Pathology and Medicine: Diagnosis and Therapy.

In recent years, several non-invasive imaging techniques have been applied to the oral cavity. These techniques can help add information during the clinical examination to shorten the time needed for biopsies and guide the process by selectively identifying and targeting only highly suspicious lesions at their most representative sites.

Moreover, clinical efforts and scientific research are increasingly pursuing the development of new assistive tools and minimally invasive techniques for novel therapeutic approaches. Photodynamic concepts have arisen as a considerable development area of research for both diagnostic and therapeutic clinical applications.

This Special Issue aims to collect high-quality original research articles, reviews, case series, and case reports on the diagnosis and treatment of oral diseases.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
