

Special Issue

Materials and Technologies in Oral Research

Message from the Guest Editors

Dentistry is a rapidly evolving discipline; however, some treatments still have critical issues, such as the need for great patient compliance or success rates that are still very operator dependent. Furthermore, thanks to improvement in the diagnostic criteria, some pathologies that cause irreversible damage to the dental structures can be prevented, resulting in both biological and economic savings. Selected papers about research on novel materials and technologies for dentistry and oral health are welcomed for this Special Issue. All fields of dentistry can be covered but with the requirement to deal with an innovative topic, device, material or technique that could promote an advancement in the dental field. **Keywords** artificial intelligence
new technologies
dental implants
orthodontics
periodontics
prosthodontics
oral surgery
photobiomodulation
biomarkers

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
