

Special Issue

Advances in Natural Product Chemistry and Pharmacology

Message from the Guest Editors

Natural products are the most abundant sources for providing unaccountable components with a huge diversity of structures, shedding light on the discovery of new active compounds. Since the last century, many medicinal plants have been well studied. However, it remains significant to continue exploring new secondary metabolites from natural sources and to evaluate their potential. Moreover, it is also important to generalize the dominant class of natural products from the same species, genus, and family, the same subclass from different sources, and different compounds with the same biological activities, to highlight their natural properties and point out targets in the future. This Special Issue will focus on:

- research articles on new natural products and their biological activities
- review well-known important medicinal plant species or genus
- review certain subclass of natural products and their therapeutic potentials
- review natural products having particular biological activities

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
