Special Issue

Intelligent Logistics and Supply Chain Systems

Message from the Guest Editor

Globalization and fast-changing technological developments have a direct impact on supply chain design and management. When managing the supply chain's components, modern supply chain procedures must be adaptable, proactive, integrated, and information driven. Customers who use intelligent logistics and supply chain systems are given the ability to precisely control every stage of the transportation lifecycle, including contracting, planning, executing, and tracking shipments, as well as having control over managing yards, making appointments, and financial issues. The goal of this Special Issue on “Intelligent Logistics and Supply Chain Systems” is to establish a dynamic platform where different knowledge streams will be concentrated in order to exchange knowledge and experiences that promote innovation in these areas. Moreover, this Special Issue aims to present practical innovations in intelligent logistics systems and promote the practicality of the intelligent logistics system and supply chain management process for optimizing the design of the intelligent logistics system and supply chain management.

Guest Editor

Prof. Dr. Panagiotis Tsarouhas
Department of Supply Chain Management (Logistics), International Hellenic University, 60100 Katerini, Greece

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
