Advances in Biosignal Processing

Message from the Guest Editors

This Special Issue is concerned with biosignal processing from ECG, EMG, EEG, and PPG signal information. Furthermore, it includes classification, prediction, diagnosis, biometrics, and various real-world applications based on deep learning and computational intelligence.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
