Neuromuscular Performance Analysis in Sports

Message from the Guest Editors

This Special Issue aims to advance the understanding of performance monitoring and injury risk assessment in both team and individual sports. We encourage submissions investigating acute and chronic physiological, biomechanical, and neuromuscular responses to training and competition, as well as adaptations to different training interventions. Original research, applied studies, and innovative methodological approaches with practical relevance for coaches, practitioners, and sports scientists are welcome.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
