Innovative Functional Materials for a Sustainable Future: From Synthesis to Application

Message from the Guest Editors

We invite original research articles, reviews, and perspectives for a Special Issue dedicated to “*Innovative Functional Materials for a Sustainable Future: From Synthesis to Application*”. As the global demand for sustainable technologies intensifies, the development of advanced materials that offer functionality, efficiency, and environmental compatibility has become a critical focus across scientific disciplines. Join us in advancing the frontier of materials science toward a more sustainable future. Submissions will undergo rigorous peer review and be published in *Applied Sciences*, reaching a global audience of researchers, innovators, and practitioners.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
