

## Special Issue

# Phytotoxic Substances: Characterization, Activity, and Application

### Message from the Guest Editor

Despite the tremendous growth in the research in phytotoxic substances, though, there may still be unknown substances in certain plant species. Determination of the genetic and biosynthetic pathways of phytotoxic substances is also challenging.

Thus, new information and methodologies can be a potential source of significant findings for researchers in the near future. The aim of this Special Issue is to contribute to the better understanding of phytotoxic substances by introducing exciting discoveries and significant examples. Keywords

- activity
- application
- biosynthesis
- characterization
- mode of action
- bioherbicide
- phytotoxic substances

---

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
