

Special Issue

Prevention and Treatment of Medical Diseases in Vulnerable Populations

Message from the Guest Editors

The main topics of this Special Issue will be medical diseases in vulnerable populations, including migrants, ethnical and social minorities, people experiencing homelessness. In this Special Issue, we aim to publish reviews, original articles, clinical studies, case reports, and case series that could help clinicians to better understand the pathology, etiology, diagnosis, prevention, and management of medical conditions in vulnerable populations. Many of those persons are especially fragile, refugees, children, women and disabled people, and very little is known about the healthcare needs of these groups. This Special Issue is an opportunity to discuss recent findings to improve clinical decision-making and care of medical disorders affecting this target of population on studies conducted worldwide. Review papers are also welcome.

Guest Editors

Dr. Gaspare Palaia

Dr. Alice Bruscolini

Dr. Massimo Ralli

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
