New Trends in Production and Operations Management

Message from the Guest Editor

The scope of this Special Issue on “New Trends in Production and Operations Management” is to provide scientific research on issues that are related to the interests and concerns of managers that manage the operations, design and supply chains of products and processes. This includes all subjects in the operations, design, and supply chain management of products and processes, i.e., contribution of performance measurement to operations and supply chain management, sustainable operations, maintenance management, risk management and resilience, logistics, quality management, reliability analysis, lean management, manufacturing and service operations management, strategic management, supply chain management, etc. Moreover, we encourage papers utilizing all research paradigms, as well as case studies.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
