

## Special Issue

# Innovative Techniques in Endodontics and Restorative Dentistry

### Message from the Guest Editors

Dentistry is in a constant state of change and has developed very rapidly. This is especially true for the fields of endodontics and restorative dentistry, involving digitalization, 3D imaging, additive manufacturing processes, and much more. This Special Issue aims to collect high-quality original research articles, reviews, and technical notes related to innovative techniques in endodontics and restorative dentistry, such as outcome studies, studies on new restorative materials, endodontic anatomy studies, and research on static and dynamic navigation, to name a few. We look forward to receiving your submissions.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
