Special Issue

Artificial Intelligence in Virtual Design and Construction (VDC): Present Status, Opportunities and Future Challenges

Message from the Guest Editors

This Special Issue aims to collect high-quality review papers from the fields of Virtual Design and Construction research and practices. We encourage researchers from the fields of Construction Science, Technology, Engineering, and Management to contribute review papers that highlight the latest developments in their research field, or to invite relevant experts and colleagues to do so. Topics of interest for this Special Issue include, but are not limited to: Artificial Intelligence (AI) Technologies Innovations in Virtual Design and Construction (VDC) Leveraging AI and VDC for Resilience AI Equity: Ensuring Access to AI for All For more information on the Special Issue, please visit LINK https://www.mdpi.com/journal/applsci/special_issues/R6DK433F3A

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
