

Special Issue

Technological Innovations for Stabilization and Rehabilitation in Pavement Engineering

Message from the Guest Editors

This Special Issue of *Applied Sciences* is dedicated to high quality papers related to research and development in the field of innovative and up-to-date technologies for stabilization, reinforcement and rehabilitation of pavements. Researchers, professionals, and students are invited to submit original research papers, review articles, and case studies. Topics include but not limited to:

- Pavement engineering
- Roads and airfields
- Asphalt pavements
- Concrete pavements
- Reinforcement
- Rehabilitation
- Stabilization
- Non-conventional materials
- Geosynthetics
- Self-healing materials
- Nanotechnology
- Sustainable development
- Environment

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief
