

Special Issue

Advance of Reinforced Concrete

Message from the Guest Editors

The special issue is to develop existing theories and gain new knowledge related to the need to obtain improved concrete compositions, reinforced concrete products, and structures. Unique analytical, mathematical, chemical, and experimental methods for studying the structure of concrete, the development of new formulations and technologies, including the activation of various components of concrete and reinforced concrete to improve the characteristics of buildings and structures obtained from these materials, are seen as critical scientific areas. Therefore, articles with numerical experiments, experimental laboratory studies, analysis of the data obtained using mathematical methods, mechanical calculations, deformation calculations, and investigations on concrete structure are welcome.

Guest Editors

Prof. Dr. Alexey Beskopylny
Dr. Evgenii Shcherban
Dr. Sergei Stel'makh

Deadline for manuscript submissions

closed (30 November 2022)

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
