

## Special Issue

# Advanced Food Detection Technology

### Message from the Guest Editors

Food safety is an important element of human health as food is a building block for health. An increasing number of consumers are starting to pay attention to the quality of the food they consume. As a result, more and more countries are creating regulatory mechanisms to monitor food quality. The nutritional value of food depends on how it is packaged and the storage processes. This Special Issue of *Applied Sciences* addresses different advanced food detection technologies coupled with various chemometric approaches and methods to identify fraud and adulteration of different foods, including, but not limited to, fruits, vegetables, meat, bread, milk products, cereals, infant foods, honey, and honey products. Submissions related to destructive or nondestructive and cutting-edge analytical techniques for the detection and quantification of different toxic or undesired contaminants such as antibiotics, colorants, preservatives, etc., in natural, traditional, or widespread foods are welcome to be submitted. Additionally, manuscripts describing food composition analysis or food origin identification related to macro, micro, or trace components are also welcome.

---

### Guest Editors

**Dr. Elisaveta Mladenova**

Faculty of Chemistry and Pharmacy, Sofia University, 1, James Bourchier Boulevard, 1164 Sofia, Bulgaria

**Dr. Veselina Panayotova**

Department of Chemistry, Faculty of Pharmacy, Medical University of Varna, 9000 Varna, Bulgaria

---

### Deadline for manuscript submissions

20 September 2026

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
