

Special Issue

Applications of Novel Materials and Surfaces in Additive Manufacturing

Message from the Guest Editors

This Special Issue will publish high quality original research papers dealing with:

- Material preparation procedures;
- Material characterization methods and procedures;
- Material recyclability and life cycle assessment;
- Material application processes;
- Surface properties and structure;
- Enhancing surface functionality;
- Assessment of products made via additive manufacturing;
- Additive manufacturing processes.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief
