

Special Issue

Recent Advances in Smart Materials and Structures

Message from the Guest Editors

We are inviting submissions to the Special Issue entitled “Recent Advances in Smart Materials and Structures”.

The application of smart materials and structures is one of the most important issues of the future. To create a more advanced form of materials and structures, it is necessary to provide the required functions of sensing, information converting, automated response, self adaptation and so on. Typically, smart materials can be subdivided based on their response mode or different external stimulus. Therefore, devices based on smart materials and structures can be applied for multi-functional sensors, photoelectric and piezoelectric fields, and so on. In this Special Issue, we invite submissions exploring cutting-edge research and recent advances in the field of smart materials and structures. Both theoretical and experimental studies are welcome, as well as comprehensive review and survey papers. **Keywords**

- smart materials
- micro/nano structures
- functional devices
- fabrication method

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
