

## Special Issue

# Recent Applications of Smartphone and Smart Glasses in Applied Science and Engineering

### Message from the Guest Editor

Smart glasses or smart goggles are optical head-mounted displays that project a virtual image that is visible to the wearer on top of the real-world view. Smart glasses provide both the intrinsic function of glasses for viewing objects in front and the functions of a smartphone. Unlike smartphones, smart glasses have a great advantage of freeing both hands of the worker so that they can focus on the work. Therefore, smart glasses can also be used in various fields, including healthcare, training, logistics, and tourism. Many applications of smartphone and smart glasses have been developed in the realm of applied science and engineering for purposes of collecting, storing, analyzing, and visualizing various sets of information and data. This Special Issue (SI) aims to encourage scientists, engineers, educators, students, and researchers to address the current state-of-the-art applications of smartphone and smart glasses in applied science and engineering. Original research contributions and reviews showing the improvements brought by smartphone and smart glasses applications in all areas of applied science and engineering can be included in this SI.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
