

Special Issue

Sports and Exercise Rehabilitation

Message from the Guest Editor

Sports and exercise rehabilitation is generally concerned with the rehabilitation and prevention of injury, disability or degradation in order to achieve better or optimal levels of functions regardless of age and ability. In the present Special Issue, we aim at innovation in or new therapeutic approaches to “Sports and Exercise Rehabilitation”, such as the new therapeutic approaches, innovative management, new designed devices, new sports apparatus, new therapeutic exercising apparatus, new APP for sports and exercise, computer-assisted therapy, Artificial-Intelligence-assisted therapy, robot-assisted therapy, and Virtual-Reality-assisted therapy to achieve better or optimal levels of various functions (musculoskeletal function, cardiopulmonary function, neurological function, sensory integration, sensorimotor integration, visual function, hearing function, pain perception, fitness, sports performance, quality of life, occupational functions, and so on). Original research manuscripts or reviews manuscripts in the field are both welcomed in the present Special Issue. Systematic reviews should follow the PRISMA guidelines.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
