

Special Issue

State-of-the-Art in Structural Steel Engineering

Message from the Guest Editors

Steel structures are undergoing permanent change, especially with new challenges such as green construction, climate change, sustainability, and achieving carbon neutrality. Materials engineering has developed rapidly in recent decades, with the development and successful application of high-strength steels (HSS) and stainless steels (SS). Numerical methods, which aim to model the adequate static and dynamic behavior of structures, have become increasingly important. Thin-walled steel structures are also becoming more widely used. In parallel, a great deal of attention focused on the methods of calculating the joints for these structures, and the influence of these joints on the behavior of the whole structure. This Special Issue invites you to publish scientific and review articles on the development and design of steel bridges and structures. Submissions should focus on the development and application of modern trends in the research on steel structures; advanced analytical, numerical, and experimental methods of analysis; and case studies of simulations of structures with applied novel materials.

Guest Editors

Prof. Dr. Algirdas Juozapaitis

Department of Steel and Composite Structures, Vilnius Gediminas Technical University, Vilnius TECH, LT-10223 Vilnius, Lithuania

Prof. Dr. Alfonsas Daniūnas

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
