Supportive Care and Palliative Medicine Interventions in Improving Quality of Life

Message from the Guest Editor

Patients' quality of life has become one of the most important purposes of medical practice and scientific research. With the increasing life expectancy and remarkable achievements in the medical field, finding out and offering better solutions has become an outstanding aim for improving life quality in patients with different chronic, progressive diseases, as well as for supporting and preventing the burden of care in their families. This Special Issue aims to address the current concern in identifying the most appropriate supportive and palliative interventions of health professionals in order to provide better quality of life for their patients. Topics may include studies on palliative medicine, on cancer and non-cancer diseases, and supportive treatment for patients facing serious illnesses.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
