

Special Issue

Fluorescence Methods for Biodiesel Characterization

Message from the Guest Editors

The pursuit of sustainable energy alternatives has driven biodiesel research. However, rigorous quality control is required to ensure optimal performance, stability, and safety during transportation and use. Therefore, sensitive, rapid, and non-destructive analytical methods are necessary for biodiesel characterization. We invite contributions to this Special Issue, which will foster a broad and insightful discussion on the advances, challenges, and future perspectives of fluorescence spectroscopy in biodiesel research. By gathering contributions from leading experts and emerging researchers, this Special Issue will strengthen fluorescence-based methods as vital analytical tools for developing sustainable fuels.

Guest Editors

Prof. Dr. Samuel L. Oliveira
Prof. Dr. Keurison F. Magalhães
Prof. Dr. Anderson R. L. Caires

Deadline for manuscript submissions

30 June 2026

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
