Text Mining with Information Extraction: Latest Advances and Prospects

Message from the Guest Editors

In the era of data deluge, text mining and information extraction have become critical tools for transforming unstructured textual data into actionable knowledge. With the rapid evolution of machine learning, natural language processing (NLP), and large language models (LLMs), the synergy between text mining and information extraction has entered a transformative phase. This Special Issue aims to showcase cutting-edge research, methodologies, and applications at the intersection of text mining and information extraction. We invite contributions that explore innovative approaches, theoretical foundations, and practical implementations that push the boundaries of what is possible in this fast-evolving field.

Guest Editors

Dr. Loukas Ilias

Dr. Dimitrios Askounis

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
