Advances in Biological Activities and Application of Plant Extracts

Message from the Guest Editors

Plant extracts are an important source of antioxidants and anti-inflammatory compounds and are always of scientific interest. Many studies are being conducted in order to identify their mechanism of action. Considering the above-mentioned worldwide circumstances, we would like to encourage leading scientists working on the topics of bioactive food, as well as studying biological activities of novel plant extracts, to submit original research or review papers. In particular, we welcome those that address any aspect of the use of novel bioactive compounds for food production and human nutrition. Papers on the study of medicinal plant bioactivity are also welcome. Keywords

- biological activity
- plant extracts
- bioactive food
- biological compounds
- natural products
- medicinal plants bioactivity

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
