

## Special Issue

# Novel Technologies in Interventional Radiology

### Message from the Guest Editor

This Special Issue deals with novel developments of devices and techniques in interventional neuroradiology including material development, stent shapes and productions, as well as application of the stents, novel techniques and catheters. Furthermore, the clinical applications alongside the first results are being included in this issue. Clinical focus will be on stenosis, acute stroke, aneurysms and arterio-venous-malformations.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
