

Special Issue

Application of Computed Tomography in Endodontics

Message from the Guest Editor

Among the many technical innovations in endodontics in recent years, three-dimensional imaging is certainly one of the most important. In particular, the introduction of cone beam computed tomography (CBCT) has enriched our clinical routine, as conventional radiographs have limitations. From diagnosis to therapy planning (such as guided endodontics), 3D imaging can be of great help in endodontics. This Special Issue focuses on any aspect of three-dimensional imaging in endodontics, such as outcome studies, endodontic anatomy studies, and static and dynamic navigation, to name a few.

Guest Editor

Dr. Thomas Connert

Department of Periodontology, Endodontology and Cariology,
University Centre for Dental Medicine UZB, University of Basel, 4058

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
