

Special Issue

Nutrition, Safety and New Processing Technologies: Prospects in Meat Products

Message from the Guest Editors

To meet the growing demands of consumers, meat science requires constant development and the search for new considerations. The quality features of meat products, which were accepted a few years ago, may be insufficient today due to the growing expectations of consumers. Future requirements include not only the production of more food, but also food which is safe, nutritious and has been sustainably produced. We invite you to publish original scientific papers and review papers. Contributions related to animal husbandry conditions and meat quality, the life cycle assessment of meat products and consumer behavior are also welcome. The results of chemometric studies are also valuable, especially in the context of obtaining information (models) for classifying and predicting the quality parameters of meat products. We believe that this Special Issue will contribute to the promotion of the latest knowledge for a wide audience, both among food producers and scientists.

Guest Editors

Dr. Paulina Kęska

Department of Animal Raw Materials Technology, Faculty of Food Science and Biotechnology, University of Life Sciences in Lublin, Skromna 8, 20-704 Lublin, Poland

Dr. Anna Kononiuk

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
