

Special Issue

Nanomaterials and Surface Science

Message from the Guest Editors

Functional materials include various materials from ceramics, composites, metals or polymers with special properties. This Special Issue contains topics such as the interdisciplinary approach between materials science, physics, chemistry and biology on the nanoscale. It also investigates the most promising ways to enrich the functional properties of different materials, especially nanomaterials surface modification. The development of material science relies on the performance of advanced materials. We are pleased to invite to submit your latest findings and results as full-length articles or reviews to the Special Issue on “Nanomaterials and Surface Science” of the journal *Applied Sciences MDPI*. This Special Issue aims to address the evolution of nanomaterials and their impact on the surface and functional properties of advanced materials, such as thin coatings. Topics include (but are not limited to) the following: surface engineering, functional and advanced materials, modification of surfaces, thin coatings, and the characterization of nanomaterials and their function.

Guest Editors

Dr. Sylwia Sowa

Dr. Joanna Kacprzyńska-Gołacka

Prof. Dr. Smolik Jerzy

Deadline for manuscript submissions

20 August 2025

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
