Innovative Techniques and Materials in Implant Dentistry

Message from the Guest Editors

Dental implantology stands at the forefront of modern dentistry, representing the primary and preferred treatment for replacing missing teeth. New dental implants and improvements in surgical procedures, dental materials, digital dentistry and research techniques have enhanced clinician workflows and the standard of care provided to patients, thereby improving treatment quality and outcomes. We would like to invite you to contribute to an upcoming Special Issue titled "Innovative Techniques and Materials in Implant Dentistry". This Special Issue seeks the submission of original research, review articles, and case studies that cover the latest advancements in basic, clinical and translational research in the field of implant dentistry.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
