Opportunities and Threats in Meat Processing

Message from the Guest Editors

Dear colleagues, Scientific research on the effects of different treatments on biological materials has been carried out for over a century. During this time, knowledge and technology have developed significantly. What phenomena in meat determine the industrial use of new technologies and breeding achievements? Why is the usage of new techniques in meat technology limited? What phenomena (factors) limit the use of new technologies in meat processing? What new applications of new technologies and techniques in meat processing appear, considering the latest research results? Answering many of these questions will require a new approach, taking into account the latest scientific research results and industrial experience. Therefore, we invite you to submit your original research on these topics. Studies on new opportunities, threats, possibilities, limitations, benefits, and difficulties in the use of new technologies in meat processing are welcome.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
