

## Special Issue

# Ultrasound Technology for Clinical Diagnosis and Decisions Making

### Message from the Guest Editor

The papers should present all relevant guidelines and should conclude recommendations with the level of evidence and a grade of recommendation, therefore, include the published evidence for the respective imaging methods. The paper should also intend what studies are necessary to change the evidence in favor of ultrasound. The special issue is about the clinical decision making using ultrasound. The organs are

- Hepatobiliary
- Pancreas
- Gastrointestinal tract
- Lung
- Kidney
- Eventually other organs as well

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
