

Special Issue

Urban Chemical Pollution on Water Quality and Degradation Ways

Message from the Guest Editor

With the progress of industry and social development, water pollution is becoming more and more serious and has become the number one environmental governance problem in the world. Among the water pollution caused by human production activities, chemical pollution is the most serious. For example, industrial wastewater contains many pollutants and has a complex composition, making it difficult to purify or treat. This Special Issue presents an international approach to providing the latest developments in studying the effective methods of treating chemically polluted wastewater. If you are interested in water resource treatment methods, sewage treatment, or activated carbon application, you are welcome to contribute.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
