## Recent Advances and Applications of Artificial Intelligence of Things (AloT) Technology

## Message from the Guest Editor

AloT (Artificial Intelligence of Things) is a concept that combines artificial intelligence (Al) and the Internet of Things (IoT). IoT devices can interact smartly, learn from each other, and become intelligent by utilizing Al technologies such as machine learning, data analysis, and cognitive technology. AloT combines Al technology with IoT to enable more efficient automation and databased decision-making. This enables increased productivity, convenient service provision, and the creation of new industrial areas.

## **About the Journal**

## Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multidimensional network.

## Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.
