

Special Issue

Recent Advances in Visual Representation and Reasoning

Message from the Guest Editor

Visual representations play a fundamental role in problem solving, enabling the use of spatial features for potential computational or cognitive advantages, for example.

A key aim of this Special Issue is to draw together the state of the art across different diagram types, fields of application and problem areas in order to raise awareness and identify commonalities, distinctions and potential synergies. The scope covers the theory and application of visual representations within the sciences, where representation itself is essential to the problem at hand. Survey-type articles are welcome, in addition to standard research articles. **Keywords**

- visual representations
- diagrammatic reasoning
- visual languages
- knot diagrams
- Euler diagrams
- combinatorial designs
- graphs
- hypergraphs
- string diagrams
- visual proofs

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
