Special Issue

Adaptive Dynamic Programming and Control Application in Intelligent Systems

Message from the Guest Editors

This Special Issue aims to provide up-to-date research concepts, theoretical findings, and practical solutions that could help advance ADP technologies. Topics of interest include, but are not limited to, the following:

- ADP-based intelligent control methods;
- Deep ADP technology;
- ADP for optimal regulation problems;
- ADP for game theory;
- ADP for large-scale systems;
- ADP for multi-agent systems;

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
