

Special Issue

Advances in Additive Manufacturing: Horizons of Novel Processes and Applications

Message from the Guest Editor

Additive manufacturing (AM) is highly attractive to scientists, as well as to mechanical, materials, chemical, and biomedical engineers and technologists, and it involves not only different important issues of physics and chemistry, but also machinery, software, machine learning, process organization, control, optimization and repeatability, economics, materials characterization, failure analysis and quality assurance, etc. The main reason for its popularity is the unique possibility of combining AM with different 3D printing technologies relevant to a wide spectrum of materials (metals, ceramics, composites, polymers, organics, etc.) with processes digitalization and artificial intelligence. This Special Issue provides a forum for researchers, engineers, and practitioners to report their latest achievements and to highlight critical issues and challenges for future investigations of the design and applications of 3D printing and additive manufacturing.

Guest Editor

Dr. Alexander Katz-Demyanetz

Technion's R&D Foundation, Israel Institute of Materials Manufacturing Technologies, Haifa, Israel

Deadline for manuscript submissions

closed (20 November 2025)

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
