

## Special Issue

# Smart Healthcare: Techniques, Applications and Prospects

### Message from the Guest Editor

The challenges of modern society, including population aging, insufficient medical services, and a declining workforce due to low birthrates, have increased demand for innovative solutions in healthcare. In this context, smart healthcare will play a pivotal role in supplementing and improving health and medical services. Smart healthcare is revolutionizing daily healthcare practices and behaviors. Cutting-edge technologies such as AI and IoT have the potential to significantly alleviate the burden on personal health management and medical care systems.

This Special Issue, "Smart Healthcare: Technologies, Applications and Prospects", will bring together the latest achievements and insights in this field, exploring its future possibilities from an academic perspective. We look forward to your contributions in order to help build the bridge between research and daily application.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
