

Special Issue

Advances in Optical Materials and Devices: From Fundamentals to Applications

Message from the Guest Editor

This Special Issue will publish new experimental and theoretical results, as well as concise reviews, related to the broad field of optical materials, structures, and devices. Relevant topics are not limited to fundamental research. We also encourage the submission of manuscripts focusing on the practical applications of optical materials, structures, and devices, including, but not limited to, lasers, optical sensors, scintillators, photovoltaics, light-emitting devices, phosphors, nanomaterials, thin films, and other related topics.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
