

Special Issue

Advances in Computer Security and Applied Cybersecurity

Message from the Guest Editors

Given the current advances in the field of Fast Internet, Smart Computation and AI, proper Cyber Security Mechanisms are essential in securing Cyber Critical Infrastructures, Big Data Centers, Businesses, Industries and Governments worldwide. This Special Issue will present up-to-date cutting-edge research in the field of Cyber Security Mechanisms and Services, AI and Ultra Smart Computational Devices as tools to create a safe and secure cyberspace. The papers published in the Special Issue will be peer reviewed and indexed in the Scopus and Web of Science Databases. The Special Issue will promote the creation of global, multidisciplinary research consortiums to help us work together.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
