

## Special Issue

# Natural Language Processing in the Era of Artificial Intelligence

### Message from the Guest Editors

In an era when massive amounts of data have become available, researchers across various domains increasingly require the expertise of language engineers to process large quantities of literature, data, and records. Whether in healthcare, finance, education, social sciences, or any other field, linking the contents of these documents to each other, as well as to specialized ontologies, can enable access to and discovery of structured information, fostering significant advancements in natural language processing and research.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
