

Special Issue

Satellite Geodesy and Earth System Monitoring

Message from the Guest Editors

We are excited to announce a Special Issue of Applied Sciences, titled "Satellite Geodesy and Earth System Monitoring". In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the time-dependent applications of satellite geodesy in:

Meteorology and Atmospheric Modelling: Monitoring temporal variations in atmospheric phenomena, including ionospheric and tropospheric conditions, and their impacts on weather patterns, climate change, and atmospheric pressure shifts using GNSS and satellite-based systems.

Hydrology and Temporal Water Cycle Variability: Tracking changes in groundwater levels, terrestrial water storage, river flow, and hydrological extremes over time using satellite geodesy techniques.

Oceanography and Cryosphere: Monitoring temporal changes in sea levels, ocean currents, and dynamic ocean circulation patterns using satellite altimetry and geodetic methods to track both seasonal and long-term oceanic fluctuations.

Geodynamics: Monitoring the temporal evolution of Earth's surface deformation.

Guest Editors

Prof. Dr. Mehdi Eshagh

1. Division of Meteorology-Forecast and Observations, Department of Research and Developments, Swedish Meteorological and Hydrological Institute (SMHI), Norrköping, Sweden
2. Department of Applied Geomatics, University of Sherbrooke, Sherbrooke, QC, Canada

Dr. Robert Tenzer

Department of Land Surveying and Geo-Informatics, The Hong Kong Polytechnic University, Hong Kong, China

Deadline for manuscript submissions

20 October 2025

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
