Special Issue

Advanced Methodology and Analysis in Fire Protection Science

Message from the Guest Editors

The significance of a fire protection science in the field of engineering cannot be underestimated. Within this scope, research efforts are focused on understanding and investigating fire spread and thermal response through a combination of experimental, theoretical, and computational methods, with goals of uncovering the fundamental characteristics of fire behavior and developing effective fire protection strategies. This Special Issue aims to explore and promote the application of fire protection science in various engineering processes, providing readers with the latest research findings and innovative developments.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo

Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
