

Special Issue

Traffic Safety Measures and Assessment: 2nd Edition

Message from the Guest Editors

A significant number of studies have been conducted in recent decades in attempt to reduce crash frequency and severity for roadway users. In order to achieve this goal, safety measures play an important role in quantifying various safety conditions/scenarios, and safety assessment is vital to evaluating the cost-benefit ratio of safety treatments. With this Special Issue, we aim to propose innovative methods and statistical techniques to quantify traffic safety risks and evaluate the effectiveness of the newly developed safety improvements. The analytic methods included in this SI are expected to differ considerably from traditional ones. We welcome all individuals interested in this topic to contribute to this Special Issue. I look forward to receiving your submissions.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
