

Special Issue

Advances in Sustainable and Green Building Materials

Message from the Guest Editor

This Special Issue invites contributions focused on Sustainable and Green Building Materials, with a particular emphasis on the use of strategies for decarbonizing the built environment through novel low-carbon construction materials. Topics of interest include cementitious and concrete composites, green concrete technologies, green pavement materials, alternative cementitious materials, geopolymers, 3D printing of cementitious materials, and structural health monitoring and advanced sensing technologies. Both original research articles and comprehensive reviews are welcome to be submitted to this Special Issue.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
