

## Special Issue

# Advances in Solar-Thermal Conversion Technologies

### Message from the Guest Editor

The development of renewables is among the biggest challenges in order to counteract greenhouse gas emissions and their effects on the climate. Solar energy plays a key role in its direct thermal use for saving fossil fuels and CO<sub>2</sub> emissions. It is also important in terms of its thermodynamic use. Though its development is quite promising due to its economic viability and recent technological advancements, the future penetration of solar energy is subdued due to advancements in conversion technology. Advancements in solar thermal conversion can be focused on technology, i.e., panels, concentration, piping, materials, etc., and applications that can be in the industrial segment (process heat) or civil applications (domestic heating or DHW production).

### Guest Editor

Dr. Filippo Busato

Department of Economics, Università Telematica Mercatorum, 00186 Roma, Italy

### Deadline for manuscript submissions

closed (20 February 2024)

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
