

Special Issue

Seating Comfort and Biomechanical Application, 2nd Edition

Message from the Guest Editors

We spend most of the day in a sitting position, excluding sleeping time. For this reason, there are various types of “sitting” for various people in various places, and there are chairs and seats that support them. In fact, we unconsciously use many different types of seating. In this Special Issue, we would like to focus on the latest research results on sitting comfort and research methodologies, especially the application of biomechanics. In comfort research, many new methods have been developed that are not only based on conventional methodologies but also on small wearable sensors, image recognition, and many other classical methods. In addition, more detailed human body models, personalized models, and open-source analysis systems have been developed. We encourage you to submit your latest research results on these comfort-related topics. We look forward to hearing from you.

- seating comfort
- sitting posture
- pressure distribution
- human model for comfort
- comfort measurement
- prolonged sitting
- fatigue
- posture monitoring
- sedentary work
- dynamic comfort

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
