

Special Issue

Applied (Meta)-Heuristic in Intelligent Systems

Message from the Guest Editor

The publication of our Special Issue will position itself at the research frontier in applied sciences. We are soliciting contributions (research and review articles) covering a broad range of topics on sustainability and artificial intelligence, including (though not limited to) the following: Applied (meta)-heuristic computing;

Ant-colony optimization;

Bio-inspired algorithm;

Differential evolution;

Evolutionary computation;

Genetic algorithm;

GRASP;

Hybrid metaheuristics;

Hyper-heuristics;

Math-heuristics;

Particle swarm optimization;

Scatter search;

Simulated annealing;

Soft computing;

Swarm-based algorithm;

Tabu search.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
