

# Special Issue

## Applied Sciences in Oral Pathology

### Message from the Guest Editor

The main topics of the Special Issue will be oral pathology and oral medicine. In this Special Issue, we aim to publish reviews, original articles, clinical studies, case reports, and case series that could help oral pathologists to better understand the pathology, etiology, diagnosis, prevention, and management of oral conditions of the head, neck, and oral mucosal structures; orofacial pain conditions; salivary gland disorders; and taste disorders. The dental management of people with medical problems and/or complicated medical conditions is also a topic of interest in this Special Issue. Topics of interest for this Special Issue include, but are not limited to, the following:

- Potentially malignant disorders and oral carcinoma: diagnosis and management;
- Diagnosis and treatment of benign lesions of the oral mucosa;
- Oral diseases in patients with systemic problems;
- Management of oral and maxillofacial pain;
- New technologies in dentistry and oral pathology;
- Management of special-needs patients;
- Management of interesting clinical cases.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
