Advances in Bee Products and Its Processing Technology

Message from the Guest Editors

Bee products are currently receiving increasing attention because of their remarkable levels of valuable nutrients and bioactive compounds and are well-known for their health benefits. In this Special Issue, we cordially invite scientists to submit their original, unpublished research papers or review manuscripts to compose a Special Issue on several aspects relating to bee products, such as the extraction, identification, characterization, and analysis of major or minor components, bioactive compounds, nutritional values, health benefits, functional properties, analytical methodology, and the effect of processing technology, among others.

I am looking forward to receiving your interesting and innovative work.

Keywords covered in this Special Issue include (but are not limited to):

processing;
analysis;
extraction;
health benefits;
prevention of disease;
antioxidant activity;
bioactive compounds;
quality improvement

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
